

Dear Ayla Alexander,

Here at Corporate Vision we're looking to celebrate the most successful, innovative and influential female CEOs from across the business world.

Following extensive research by our team, taking into account your achievement over the past 12 months with Nature's Pharma, LLC, we are delighted to name you our:

Female CEO of the Year - USA.

Congratulations!

In 2016, just 4% of Fortune 500 companies have a woman at the helm, while there is just one female CEO featuring in Canada's TSX 60. During a time when women are still grossly underrepresented on the boards of companies across the world, we would like to applaud and promote those who have challenged adversity and led by example for others.

Your success at the head of Nature's Pharma, LLC has seen the company continue to grow and improve and come to attention of Corporate Vision. Our publication specializes in recognizing and promoting the experience and expertise of individuals and firms across the world to our readership of over 130,000.

We would like to feature you and Nature's Pharma, LLC in our next issue and interview you on the secret to your success. It's also a great way to talk about the firm's services and what you can provide to our readership. Our magazine is read by executives, directors and managers, all key decision-makers at firms across the world.

If you have any questions, please give me a call. My number is below in my signature, or I'm more than happy to call you myself, if you'd prefer.

Kind regards,  
Connie Woods
