NATURAL PSORIASIS CREAM

Nature's Pharma offers unique 100% natural/organic Psoriasis Cream in the form of water-soluble triple emulsion/suspension providing transdermal delivery of microencapsulated biological active ingredients through the skin. Psoriasis Cream is produced by a revolutionary US-patented technology and do not cause side effects on normal, sensitive, and hypersensitive skin.

- Psoriasis is a chronic skin disorder characterized by the formation of numerous scaly red patches on the extensor following the muscles that perform extension surfaces of the body and is characterized by recurrent, elevated red lesions, plaques or rarely pustules on the skin which are the results of an excessively rapid growth and shedding of epidermal skin.
- Natural Psoriasis Cream compositions of: (i) mixture of the plants' oils having biological active ingredients, (ii) mixture of herbal extract with antiviral activity, (iii) biological active natural ingredients, (iv) coenzyme Q10, (v) fumaric, ellagic (extract from strawberries), and caffeic acids, (vi) g-linoleic acid & a-linolenic acid, and (vii) microencapsulated sulfur oxide, and the microencapsulated vitamins C, D, A, and E.
- The traditional treatments for psoriasis include: (i) glucocorticosteroids, (ii) topical coal tars, (iii) ultraviolet therapy, (iv) methotrexate, (v) nonsteroidal anti-inflammatory Drugs, (vi) vitamins A and D, and (vi) bioengineering techniques.
- In many cases, antibiotics and hormone therapy are the only recourse and cause severe side effects. However, the use of Natural Psoriasis Cream positive effects is apparent usually within one week of the start treatment without severe side effects.
- Fumaric acid is the trans isomer of malic acid and an intermediate in the Krebs citric acid cycle. Psoriasis is regarded as a disease resulting from a metabolic error and, possibly, a defect of fumaric acid metabolism. Since the citric cycle is the center for energy production with the cell, fumaric acid must be present in every cell of the body; therefore, it is metabolically very active. The administration of the fumaric acid must be slow, as it is a metabolically very active
- Most topical treatment used today are not effective, or in many cases, can cause further skin irritation instead of healing the problem, since the most from topical treatment creams contain chemical ionic surfactants, thickener, gel-(emulsion) formation polymeric agents, and etc., which block pores and block active center of biological active ingredients significantly decreasing the healing activity. Natural PSORIASIS CREAM contains 100% all natural ingredients has high healing efficiency without adverse side effects
- Introducing a new topical formulation created just for any kind of the skin including dry and sensitive skin.
- Psoriasis control is most effective when only a very small amount is applied.
- After your skin has been cleaned, use a very small amount at bedtime as a preventative, to prevent recurrence on the area where you normally would have a flare up. For the First 3 to 6 days of using of Natural

Psoriasis Cream may increase inflammation and/or redness since the infection coming out, and should not alarm you. After two weeks, you will see significant clearing of the skin.

Purpose

It is useful for the treatment of psoriasis, clears up redness and allows skin to heal. Penetrates in pores to control psoriasis and helps keep skin clear of new redness. Helps prevent the development of new psoriasis symptoms. Natural psoriasis cream is water-soluble product, which easily removes with water so that removal does not cause the patient additional pain or tissue damage.

Biological active ingredients of natural psoriasis cream:

- decrease transdermal water loss
- reduce irritation, itching, and discomfort of the skin
- stimulate antiviral, antibacterial, and anti-microbial activities, and epidermal proliferate activity of the skin
- increase cellular turnover, strengthens skin
- stimulate anti-aging and anti-oxidant properties
- diminish appearance of broken capillaries
- stimulate as co-factor the production of collagen
- improve tone and texture
- promote faster healing due to quicker absorption and prolonged duration
- stimulate of blood circulation.

Directions:

Cleanse the skin thoroughly before applying cream. Small amount of the cream cover the entire affected area with thin layer three times daily. Because excessive drying of the skin may occur, starts with one application, then gradually increase to two or three times daily if needed or as directed by a doctor. If excessive skin irritation develops or increases, discontinue use and consult a physician.

100% ALL NATURAL INGREDIENTS

Active Ingredients Fumaric Acid (7.5%)
