WOUND CARE CREAM

WILL SIGNIFICANTLY HASTEN THE WOUND HEALING PROCESS AND REDUCES SCARRING

- Natural Wound Care Cream is great as a preventive against infections on open wounds. Natural Wound Care Cream is useful for treatments of: • Deep Non-Healing Wounds (*in particular for Diabetic Non-Healing Wounds*) • Chronic Inflammation • Burns • Radiation Burns • Insect Bites.
- Wounds are breaks in the integrity of the skin. Wounds may occur by different mechanism: (i) through mechanical traumas (cuts, tears, and abrasions), (ii) the combination of heat (burn) and pressure (sores, bed sores, decubitus callers) which reflects a mechanical injury that is more chronic in nature, and (iii) arterial and venous vascular (atherosclerotic vascular disease, diabetics, and congestive heart failure). Healing process of open cutaneous wounds includes the five stages: (i) inflammation, (ii) fibroblast and blood vessel proliferation, (iii) open connective tissue synthesis, (iv) epithelialization, and (v) wounds contraction.
- Treatment of acute and chronic wounds topically is directed to keeping the wounds as clean as possible and making as comfortable as possible.
- The composition of Natural Wound Care Cream containing the natural biological active ingredients allows:

- dissolves pus in the debridement process (i.e. wounds cleaning process)
- prevent healthy tissue from the being compromised or destroyed by infection
- encourages new skin growth
- keep the wound free infection odor free
- help to maintain a bacteria-free environment
- reduce irritation, itching, and discomfort

- Natural WOUND CARE CREAM contains 100% all natural ingredients has high healing efficiency without adverse side effects and may use for dry and sensitive skin.

- In many cases, antibiotics and hormone therapy are the only recourse, but with the use of Natural Wound Care Cream positive effects are apparent usually within one week of the start treatment.

- Natural WOUND CARE CREAM contains 100% all natural ingredients has high healing efficiency without adverse side effects and may use for dry and sensitive skin. Most topical treatments used today are not effective, or in many cases, can cause further skin irritation instead of healing the problem, since the most from topical treatment creams contain chemical ionic surfactants, thickener, gel-(emulsion) formation polymeric agents, and etc., which block pores and block active center of biological active ingredients significantly decreasing the healing activity.

- Wound control is most effective when only a very small amount is applied.

- For the First 1 to 3 days of using of Natural Wound Care Cream may increase inflammation and/or redness since the infection coming out of your pores, and should

not alarm you. After one week, you will see significant clearing of the skin.

Purpose

For the treatment of wounds. Penetrates in pores to control wounds and helps keep skin clear of new inflammation. Helps prevent the development of easily new infections. Natural wound care cream is water-soluble product, which can easily be removed with water so that removal does not cause the patient additional pain or tissue damage.

Biological active ingredients of natural wound care cream:

- decrease transdermal water loss
- prevent healthy tissue from the being compromised or destroyed by infection
- encourages new skin growth
- keep the wound free infection
- help leave the surface of wounds clean and odor free
- help to maintain a bacteria-free environment
- reduce irritation, itching, and discomfort of the skin
- stimulate antiviral, antibacterial, and anti-microbial activities, and epidermal proliferate activity of the skin
- promote faster healing due to quicker absorption and prolonged duration
- stimulate of blood circulation.

Directions

Small amount of the cream cover the entire affected area with thin layer three to four (as needed) times daily.

100% ALL NATURAL INGREDIENTS

Active Ingredients:

Salicylic Acid (3%), Sulfur USP (*in microencapsulated form*) (1%)

Zinc Oxide USP (*in microencapsulated form*) (3%).....

Anti-Inflammation, Anti-Microbial & Anti-Bacterial

Other Natural Ingredients:
